

GOKUL RATHOD

Cloud and DevOps Engineer – Fresher

Hyderabad, Telangana, India | +91 9356782322 | g2rindian2005@gmail.com | linkedin.com/in/gokul-rathod | github.com/g2rindian2005-cyber

SUMMARY

Cloud DevOps Engineer with hands-on project experience in AWS, Kubernetes, Docker, Terraform, GitHub Actions, Jenkins, ArgoCD, and Helm. Skilled in designing and deploying cloud-native applications, building automated CI/CD pipelines, and managing Infrastructure as Code (IaC). Experienced in container orchestration on AWS EKS, GitOps-based deployments, cloud monitoring, and Linux administration.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, IAM, VPC, CloudWatch, CloudFormation, Auto Scaling, ALB)

Containerization and Orchestration: Docker, Kubernetes, AWS EKS, Helm, ArgoCD

CI/CD and Automation: Jenkins, GitHub Actions, GitOps, Configuration Management

Infrastructure as Code: Terraform, AWS CloudFormation, Ansible

Version Control: Git, GitHub, Pull Requests, Code Reviews

Monitoring: AWS CloudWatch, Prometheus, Grafana, SNS Alerting

Operating Systems: Linux Administration, Networking, File Systems

PROJECTS

Cloud-Native E-Commerce Microservices Platform on AWS EKS

May 2026

GitHub Actions, Docker, Kubernetes, EKS, ArgoCD, Helm, RDS

- Architected and deployed a microservices application on Kubernetes (AWS EKS) using Deployments, Services, and Ingress Controllers, managing 5+ independent services with zero-downtime rollouts.
- Built end-to-end CI/CD pipelines using GitHub Actions, reducing release cycle time by approximately 60 percent.
- Managed GitOps-based deployments with Helm charts and ArgoCD across development, staging, and production environments.

AWS Infrastructure Automation with Terraform

July 2026

Terraform, AWS VPC, EC2, RDS, ALB, Auto Scaling

- Designed and provisioned a highly available AWS environment using Terraform, including a multi-AZ VPC with public and private subnets, an Internet Gateway, and a NAT Gateway.
- Deployed an Application Load Balancer with a target-tracking Auto Scaling Group of EC2 instances across multiple availability zones.
- Provisioned a private RDS MySQL instance with security groups enforcing least-privilege access.

AWS Monitoring and Alerting Stack

July 2026

AWS EC2, RDS, ALB, CloudWatch, SNS, Prometheus, Grafana, Docker

- Monitored AWS infrastructure including EC2, RDS, Application Load Balancer, Lambda, and EKS to ensure system reliability.
- Configured CloudWatch alarms to detect high CPU usage, low database storage, and server errors in real time.
- Built interactive Grafana dashboards using Prometheus to visualize infrastructure health and performance metrics.

TRAINING

DevOps with Multicloud

January 2026 – June 2026

NareshIT Technologies, Hyderabad

- Completed an intensive hands-on training program covering DevOps practices and multicloud infrastructure management.
- Gained practical exposure to CI/CD pipelines, containerization, orchestration, and Infrastructure as Code across cloud platforms.

EDUCATION

Dr. Ambedkar Marathwada University – Bachelor of Computer Application (BCA), 68.7% <i>Jalna, Maharashtra</i>	<i>June 2026</i>
Maharashtra State Board – Higher Secondary Certificate, 56.17% <i>Pune, Maharashtra</i>	<i>February 2023</i>
Maharashtra State Board – Secondary School Certificate, 85.80% <i>Pune, Maharashtra</i>	<i>April 2021</i>

CERTIFICATIONS AND ACHIEVEMENTS

- HackFest – Participant, cloud/DevOps-focused hackathon.
