

GOKUL RATHOD

Cloud Engineer | DevOps Engineer – Fresher

Hyderabad, Telangana, India | +91 9356782322 | g2rindian2005@gmail.com | linkedin.com/in/gokul-rathod | github.com/g2rindian2005-cyber

SUMMARY

Cloud Engineer and DevOps Engineer with hands-on project experience and current mentoring experience in Amazon Web Services (AWS), Kubernetes, Docker, Terraform, GitHub Actions, Jenkins, ArgoCD, and Helm. Skilled in designing and deploying cloud-native applications, building automated CI/CD pipelines, and managing Infrastructure as Code (IaC). Experienced in guiding and mentoring students on cloud/DevOps concepts, container orchestration on AWS EKS, GitOps-based deployments, cloud monitoring, high availability architecture, and Linux administration. Known for clear communication, strong fundamentals, and a problem-solving approach to infrastructure challenges.

PROFESSIONAL EXPERIENCE

Cloud/DevOps Mentor — NareshIT Technologies

Hyderabad, India

July 2026 – Present

- Mentoring students in AWS, Kubernetes, Docker, and Terraform through hands-on sessions and doubt-clearing.
- Guiding students in provisioning AWS resources (EC2, S3, RDS, VPC, IAM) using Terraform for Infrastructure as Code.
- Helping students build CI/CD pipelines with GitHub Actions and Jenkins for automated deployments.
- Supporting students with container orchestration on AWS EKS using Kubernetes, Helm, and ArgoCD.
- Reviewing student projects and troubleshooting issues to reinforce best practices and reliability.
- Assisting students with monitoring and alerting setups using CloudWatch, Prometheus, and Grafana.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, IAM, VPC, CloudWatch, CloudFormation, Auto Scaling, ALB, High Availability)

Containerization & Orchestration: Docker, Kubernetes, AWS EKS (Amazon EKS), Helm, ArgoCD

CI/CD & Automation: Jenkins, GitHub Actions, GitOps, CI/CD Pipelines, Configuration Management

Infrastructure as Code: Terraform, AWS CloudFormation, Ansible, IaC

Version Control: Git, GitHub, Pull Requests, Code Reviews

Monitoring: AWS CloudWatch, Prometheus, Grafana, SNS Alerting

Operating Systems: Linux Administration, Networking, Security Groups, File Systems

Collaboration & Methodology: Agile, Cross-functional Collaboration, Problem-Solving, Technical Documentation

PROJECTS

Cloud-Native E-Commerce Microservices Platform on AWS EKS

May 2026

GitHub Actions, Docker, Kubernetes, EKS, Terraform, ArgoCD, Helm, RDS

- Architected and deployed a microservices application on Amazon EKS using Kubernetes Deployments, Services, and Ingress Controllers, managing 5+ independent services.
- Provisioned and managed AWS infrastructure using Terraform, including VPC, subnets, security groups, EKS, and supporting AWS resources using reusable configurations.
- Built end-to-end CI/CD pipelines with GitHub Actions for automated application build, containerization, and deployment.
- Managed GitOps-based deployments using Helm and ArgoCD, enabling consistent application releases across environments.
- Integrated Amazon RDS for persistent database storage and configured secure connectivity between application workloads and AWS resources.

AWS 3-Tier Application June 2026

VPC, ALB, EC2, ASG, RDS

- Designed and deployed a 3-tier architecture on AWS using VPC, public/private subnets, ALB, EC2, and RDS MySQL.
- Configured Application Load Balancer and Auto Scaling Group to distribute traffic and maintain application availability.
- Implemented Security Groups and private subnet isolation to secure communication between the web, application, and database tiers.

AWS Monitoring and Alerting Stack

July 2026

AWS EC2, RDS, ALB, CloudWatch, SNS, Prometheus, Grafana, Docker

- Monitored AWS infrastructure including EC2, RDS, Application Load Balancer, Lambda, and EKS to ensure system reliability.
- Configured CloudWatch alarms to detect high CPU usage, low database storage, and server errors in real time.
- Built interactive Grafana dashboards using Prometheus to visualize infrastructure health and performance metrics.

TRAINING

DevOps with Multicloud

January 2026 – June 2026

NareshIT Technologies, Hyderabad

- Completed an intensive hands-on training program covering DevOps practices and multicloud infrastructure management.
- Gained practical exposure to CI/CD pipelines, containerization, orchestration, and Infrastructure as Code across cloud platforms.

EDUCATION

Dr. Ambedkar Marathwada University — Bachelor of Computer Application (BCA), 68.7%

June 2026

Jalna, Maharashtra

Maharashtra State Board — Higher Secondary Certificate, 56.17%

February 2023

Pune, Maharashtra

Maharashtra State Board — Secondary School Certificate, 85.80%

April 2021

Pune, Maharashtra

CERTIFICATIONS AND ACHIEVEMENTS

- HackFest — Participant, cloud/DevOps-focused hackathon.
